

Specialist Anaesthetist Adult and Emergency Anaesthesia Auckland District Health Board, New Zealand

We have full time and part time positions based at Auckland City Hospital, a large tertiary and quaternary service, with strong links with the Auckland University's Medical School. This department provides anaesthesia services for a wide range of surgical departments, including Neurosurgery, Urology, Trauma, Orthopaedics, Vascular, Solid Organ Transplant and Chronic Pain Management.

The department is also involved in research in areas including ultrasound applications in anaesthesia, techniques for bariatric surgery, pre-operative assessment and testing and team dynamics in the OR. We also have a robust teaching programme and play a key role in the ANZCA examination process.

The department has a very strong clinical base and is looking to develop wider interests in Peri-operative Medicine and Quality Assurance so an experience in these areas may be advantageous.

Auckland Hospital is situated above the harbour in the centre of Auckland, recently voted the fifth best city in the world for lifestyle. Many opportunities exist to blend world-class medicine with an unrivalled range of activities and a great place to bring up the family.

You must be eligible for vocational registration with the Medical Council of New Zealand.
